Pricing Schedule and Commercial Terms

SYNTHETIC DOCUMENT — generated for demonstration purposes. All entity names, figures, dates and findings are invented. This document describes no real company.

Quotation reference CVS-2026-4471. Valid for sixty days from 2 April 2026. All amounts in USD, exclusive of applicable taxes.

Confidential. This pricing is provided under the mutual non-disclosure agreement dated 11 March 2026 and may not be disclosed to third parties.

1. Subscription Tiers

Tier	Annual	Events / month	Retention	Support
Standard	\$18,000	50 million	13 months	Business hours
Growth	\$42,000	200 million	24 months	24x5
Enterprise	\$96,000	1 billion	36 months	24x7

Pricing assumes annual prepayment. Quarterly billing is available at a twelve percent premium. Multi-year commitments of three years or longer receive a nine percent discount applied to the annual subscription fee.

2. Overage and Usage Terms

2.1 Event overage. Usage in excess of the contracted monthly event allowance is billed at \$0.42 per additional one thousand events. Overage is assessed monthly and is not averaged across the contract term. There is no cap on overage charges.

2.2 Burst allowance. A single calendar month per contract year may exceed the allowance by up to twenty percent without incurring overage charges. The burst allowance does not carry forward and cannot be applied retroactively.

2.3 Retention overage. Data retained beyond the contracted retention window is billed at \$180 per terabyte per month. Retention extensions must be requested in writing and are applied prospectively only.

2.4 Seat overage. The Standard and Growth tiers include twenty-five and one hundred named seats respectively. Additional seats are billed at \$240 per seat per year, prorated to the remaining contract term.

2.5 True-up. Where sustained usage exceeds the contracted allowance for three consecutive months, Corvus reserves the right to require a mid-term upgrade to the next tier at the then-current list price.

3. Professional Services

Implementation services are quoted separately and are billed at \$220 per hour. A standard implementation is scoped at eighty hours and includes data source configuration, schema mapping and two training sessions.

Custom connector development is quoted on a fixed-fee basis following a scoping engagement. Historical data migration is billed at \$2,400 per terabyte with a minimum engagement of two terabytes.

4. Term and Renewal

The initial term is twelve months from the Service Commencement Date unless otherwise specified. Renewal is automatic for successive twelve month periods unless either party provides written notice of non-renewal not less than sixty days before the end of the then-current term.

Renewal pricing is subject to an uplift not exceeding seven percent of the prior term's annual subscription fee, except where usage has increased such that a tier change applies.

5. Payment Terms

Invoices are payable net thirty from the invoice date. Amounts unpaid after the due date accrue interest at one and one half percent per month or the maximum rate permitted by applicable law, whichever is lower.

6. Assumptions and Exclusions

This quotation assumes a single production environment and one non-production environment. Additional environments are billed at thirty percent of the applicable tier fee.

Pricing excludes third-party costs, including any data warehouse, object storage or identity provider charges incurred by the Customer directly.
